## **New Patent Granted to Holocom Networks**

*Fifth Patent Extends Rights to Protected Distribution System (PDS)*

**(Carlsbad, CA – April 27, 2007)** Holocom Networks, a leading provider of secure raceway products, today announced its newest patent for Secure PathWay™, a protected distribution system (PDS) that provides physical security for SIPRNet, JWICS and all other classified networks (C-LAN). Utility Patent 7,183,488, Electromagnetically Insulated Conduit and System, describes the proven technology for eliminating RF leakage from within the PDS. This is the fifth patent granted Holocom Networks for its protected distribution system which extends from the C-LAN point of presence to the end-user lock box.

“This newest patent will give prospective customers the confidence that our PDS unequivocally complies with the security standards set by NSTISSI 7003,” said Craig McCarthy, operations director and lead inventor of the patent. “The level of security is unmatched in any other raceway product and makes it equivalent to welded, steel conduit.”

Existing patents for Secure PathWay include a tested, internal locking mechanism for raceway cover retention that is releasable only by accessing a locked enclosure; a locking mechanism that maintains security and can eliminate permanently fixed raceway covers, traditionally done by applying epoxy; a cable lay-in installation method that largely eliminates “fishing” of cabling, pull boxes and external locks as required with electrical magnetic tubing (EMT); and end-user lock boxes terminating all raceway ends. The patents also address reducing modification and labor to implement moves, additions and changes, an interlocking mechanism that allows for future additions or changes, and spacers that stand the raceways off the wall.

David Pohl, chairman and chief executive officer of Patriot Scientific Corporation (OTC BULLETIN BOARD: PTSC) stated, “ As a company that understands the value of proprietary technology, Patriot Scientific is pleased with our investment as a principal shareholder in Holocom Networks. The process from market insight to design and then patent protection is exciting to watch, and we commend Holocom for this latest accomplishment.”

### **About Holocom Networks**

Holocom Networks’ suite of products and services provides physical protection for all classified networks. Its flagship product, the patented Secure PathWay™, is installed at numerous federal agencies and for all branches of the military, domestically and internationally. Headquartered in Carlsbad, CA with additional offices in North America, the Pacific Rim and Europe, Holocom Networks secures mission-critical networks at government and private facilities across the globe.

Scripps Ventures, Inc., a California merchant bank, and Patriot Scientific Corporation (OTC BULLETIN BOARD: PTSC) purchased the assets of Holocom Networks, Inc. effective February 2, 2007 through a jointly owned company, Scripps Secured Data, Inc. dba Holocom Networks.
